EDUCATION

B.Tech. in Computer Science and Technology (CST) 2025 – 2029
Madhav Institute of Technology & Science (MITS), Gwalior

SKILLS

- **Programming Languages:** C, C++, JavaScript, HTML5, CSS3
- **Frameworks & Libraries:** Node.js, Next.js, Tailwind CSS, Framer Motion, MediaPipe Hands, TensorFlow.js, COCO-SSD
- **Hardware & IoT:** Arduino Uno R3, ESP32, L298N Motor Drivers, Servo & DC Motors, BMS, Ultrasonic.
- **Developer Tools:** Git, GitHub, VS Code, Cloudflare Pages
- **Languages Known:** English, Hindi, Marathi

PROJECTS

OpticAI – Real-Time Browser-Based Object Detection github.com/PriyanshuGurdekar01/OpticAI

- Built a real-time object detection web app as a single self-contained HTML file using COCO-SSD and TensorFlow.js, running entirely in-browser with zero installation.
- Implemented live camera detection with object tracking, zone-based alerts, and structured JSON export.
- Integrated the Web Speech API to deliver voice announcements of detected objects.

Air Drawing – Gesture-Controlled Virtual Canvas github.com/PriyanshuGurdekar01/Air-Drawing

- Engineered an interactive client-side web app that lets users draw on-screen with hand gestures using real-time motion tracking, with no hardware peripherals.
- Integrated MediaPipe Hands and TensorFlow.js for hand landmark detection and rendered strokes with the HTML5 Canvas API.
- Implemented gesture-controlled brush color switching, stroke thickness adjustment, and an eraser mode.

Smart Farm Monitoring System

- Designed an agricultural IoT setup integrating microcontrollers with soil moisture and rain sensors to track environmental conditions in real time.
- **Tech Stack:** ESP32 / Arduino, Soil Moisture Sensor, Rain Sensor, Embedded C++.

Automated Sensor-Based Targeting & Tracking System

- Built an automated prototype on Arduino Uno R3 for real-time target scanning and object tracking.
- Programmed embedded firmware to coordinate ultrasonic sensor feedback with servo and DC motors via L298N drivers for proximity detection and precise movement control.
- **Tech Stack:** Arduino Uno R3, L298N Motor Driver, Ultrasonic Sensors, Servo & DC Motors, Embedded C++.

LEADERSHIP & EXTRACURRICULARS

Organizing & PR Team Member – IEEE IAS & RAS Student Branch Chapters, MITS Gwalior

- Managed event coordination, marketing, and official communications for HackSynapse and an IIT Delhi research internship webinar.

ACHIEVEMENTS & HACKATHONS

- Participant, PixelPrompt AI Challenge — Sep 2026
- Departmental Representative (Top 3, micro-project innovation), University Exhibition — May 2026
- Participant, MindHive 2026 (ISTE) — Apr 2026
- Round 2 Qualifier, Frontend Battle 2026 (IEEE Computer Society) — Mar 2026
- 3rd Position, .mov Filmmaking Challenge (Phovic Club, MITS-DU) — Feb 2026
- Participant, DevSprint 2026 AI Hackathon (GDG on Campus) — Jan 2026
- Participant, Dash-It-Up 2.0 Power BI Contest — Nov 2025
